Subject: ECA Process Major and Minor Concerns memorandum dated 2012.07.06

Dear members of the Sammamish Planning Commission,

I would like to support the comments of Barbara Raabe (letter July 12, 2012) and Marilyn Favre(email July 18th 2012) regarding the ECA Process Major and Minor items memo (<https://www.ci.sammamish.wa.us/files/document/9684.pdf>)

We are all responsible for defending the environment using Best Available Science experts findings. Do we want our beautiful plateau environment to be changed to the detriment of everyone and everything living here? I have seen people move away from Sammamish because they feared that would happen .

My family and I have lived here for 18 + years and would hope to live here many more if we can be responsible in preserving the environment for our and future generations.

Sincerely

Karen Gardiner.
